EDUCATION

GEORGIA INSTITUTE OF TECHNOLOGY
Master of Science in Analytics, GPA 4.0

Atlanta, GA
Aug 2024 - Dec 2025

SSN COLLEGE OF ENGINEERING, ANNA UNIVERSITY
Bachelors in Information Technology, GPA 8.53/10

Chennai, India
July 2015 - May 2019

SKILLS

Programming: SQL (BigQuery, PostgreSQL, Teradata, Hive), NoSQL (DynamoDB), Python (Pandas, NumPy), Shell, Scala, R
Cloud & Data Processing: GCP, AWS, Apache Spark, Hadoop, Dimensional Modeling, Data Warehousing, Data Lineage
Tools: dbt, Apache Airflow, UC4, Tableau, Looker, CI/CD, Git, Jupyter Notebooks, VS Code, Docker

WORK EXPERIENCE

Meta
Data Engineer - Threads Trust and Safety

Menlo Park, CA
Mar 2026 - Present

- Refactored existing distributed data pipelines to **reduce processing latency by 10%** and scaling **Content Safety signal coverage from 87% to 100%**, ensuring high fidelity, real-time policy enforcement.
- Built **executive Content Safety dashboard** using internal BI tools (Tableau/Looker equivalent) delivering high priority **2026 H1 Goal metrics** to cross-functional leadership.
- Developed a **high throughput event logging pipeline** for the Threads Composer, productizing **raw user actions (Compose, Post, Reply)** to ingest over **180M+ daily events** for downstream event analytics.

PayPal
Data Science Intern - Small and Medium Business Portfolio (SMB) Analytics

San Jose, CA
May 2025 - Aug 2025

- Designed and analyzed an **A/B test** introducing ACH (Bank Account) as a payment method for Invoicing, driving an estimated **\$18M+ annualized revenue lift** across the US market and influencing a nationwide rollout decision.
- Prototyped a **GenAI LLM agent (LangChain, MCP Server)** using **word-vector embeddings** to auto-generate production-ready BigQuery SQL, streamlining ad-hoc data request turnaround for SMB stakeholders.

PayPal
Data Engineer - Finance and Analytical Data Services

Chennai, India
July 2019 - July 2024

- Boosted BigQuery compute efficiency by 25%** through table partitioning and clustering of high-volume merchant segment datasets, guaranteeing strict forecasting and budgeting SLAs for FP&A and cross-functional teams.
- Engineered automated **Data Quality checks** utilizing statistical anomaly detection (**$\pm 2SD$ from day of week thresholds**) to halt corrupted pipelines, preventing data drift from impacting executive-facing Tableau dashboards.
- Increased engineering **debugging productivity by 20%** by developing an **ETL visualizer in Python** that dynamically maps cross-server dependency graphs and generates unified SQL execution lineages.
- Architected and executed the end-to-end migration** of legacy, on-premise Teradata data warehouses to GCP BigQuery, translating **complex SQL schemas** and refactoring **25+ downstream ETL pipelines** supporting petabyte-scale analytics.
- Drove a 15% uplift in merchant marketing engagement** by redesigning the **Merchant Classification data model**, replacing outdated legacy rules to modern, high dimensional **activity based rules**.

PROJECTS

ReadVerse: The Personalized Book Recommendation System

- Engineered an end-to-end **Neural Collaborative Filtering and Matrix Factorization model** on the GoodReads dataset, achieving **90% Recall and 77% F1-Score**, with Dropout Regularization and Adam optimization.

HONORS AND AWARDS

- PayPal - 'Global Star Award for H2, 2021' & 'Star of the Quarter for Q3, 2020'.
- Co-Founded 'ProCoDe' - Programming club of the Department of Information Technology at SSN College of Engineering.
